Cost: \$290

About Minecraft Modding Club

Love Minecraft? Learn how to make it your own! In this hands-on club, students will use MCreator and Blockbench to design and build custom Minecraft mods. They'll create new blocks, tools, crafting systems, and gameplay features while learning how coding controls the game.

Students will experiment with their creations, test and improve their mods, and develop problem-solving skills along the way. This program combines creativity with coding fundamentals, giving students hands-on experience in game development.

Who Is Our Instructor?

SK Aptacy is the Assistant Center Director at Code Ninjas Sammamish. SK has years of experience volunteering with youth organizations and a passion for children's education. SK also has experience with Python, Java, data visualization, and data analysis.

Help Minecraft Modding Club Possible

Our clubs depend on parent volunteers. Volunteering is simple — help with student check-in and check-out and stay during class. You're welcome to bring your laptop and work while you're there. No special experience required.
